Work Experience

Skip (SkiptheDishes) / Senior Product Designer

July 2023 - Present / Toronto, Ontario

- Conceived and led the 0→1 design of Shop+Pay, a first-of-its-kind grocery shopping experience for couriers — from blank canvas to shipped product used by hundreds of thousands of couriers across Canada
- Designed end-to-end courier flows across shopping, checkout, and substitutions, resulting in 800,924 completed orders and \$44M in gross transaction value within the first 18 months
- Ran cross-functional workshops with Business Operations, Customer Care, and Engineering before a single screen was designed, establishing shared requirements and alignment across 15+ stakeholders
- Designed a weighted items flow to support produce and deli items, directly enabling partnerships with Walmart and Loblaws — representing an estimated \$143M in GTV for Skip
- Reduced out-of-stock rate from 12% to 4% (67% reduction) by designing a three-option substitution system informed by moderated customer interviews and surveys
- Introduced an order review screen at the start of checkout after post-launch investigation revealed rejected substitution items were causing payment declines at the register
- Using AI-assisted tools including Claude Code, VS Code, Gemini, and other large language models — applying them as active collaborators in design and development workflows

Staples / Senior Product Designer

March 2023 - July 2023 / Toronto, Ontario

- Led the SolutionShop redesign project, ensuring user-centred design principles and design thinking were central to the process.
- Developed and maintained a WCAG-compatible design system, enhancing accessibility and consistency across all digital products, while presenting updates to executive leadership.
- Created design system documentation and training materials for the team, collaborating with product managers and developers to uphold design standards and brand identity.

Ratehub.ca / Product Designer

November 2021 - January 2023 / Toronto, Ontario

- Led design initiatives, producing user-centred designs and refining the overall platform experience.
- Conducted user research and analysis to drive design decisions, optimizing usability and performance.
- Managed the product design lifecycle for the largest revenue-generating vertical before team downsizing.

Voices / Product Designer

August 2020 - November 2021 / Waterloo, Ontario

- Created wireframes, prototypes, and high-fidelity designs to guide development teams and communicate design solutions.
- Facilitated design workshops and worked closely with developers to ensure accurate implementation of design specifications.

Industry Experience

University of Waterloo / Guest / Co-Lecturer

March 2026 - Present / Toronto, Ontario

Brainstation / Industry Speaker

January 2025 - Present / Toronto, Ontario

Moralyzer / UX Mentor
